Definitely, not me. But when I land there again, neither of us has any intention of stopping. There’s only one problem: nobody can know. Especially not my three older brothers. If they found out, all hell would break loose. So I’m willing to keep our secret... Because I want him Wright here, right now.

A startling new vision of paranormal

romance: When a human ventures into the world of vampires—a decadent milieu of blood-bonds and betrayal—she discovers that not all is what it seems. In a civilization laid waste by poverty and desperation, Reyna accepts a high-paying position with the wealthy and hungry vampire elite. Her new job is as the live-in blood escort for the intimidating, demanding, and devilishly handsome Beckham Anderson. He’s everything she expected from a vampire, except for one thing—he won’t feed off her. Reyna soon discovers that behind Beckham’s brooding, wicked

façade lies a unique and complex man. And that, in a dark and divided world, she is more valuable than she ever would have believed. For with each passing night, Reyna can't shake the sensation that it's Beckham who's afraid of her. Note: Reyna and Beckham's story continues in *Blood Match*. Carbon Dioxide Capture and Storage
Loveswept
IPCC Report on sources, capture, transport, and storage of CO₂, for researchers, policy-makers and engineers.

Mystic City K.A. Linde Inc.

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or

magnitude, but populations and assets at risk have also increased, with consequences for disaster risk.

Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to

international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.
