Winner of the first Paul A. Baran-Paul M. Sweezy Memorial Award for an original monograph concerned with the political economy of imperialism, John Smith's *Imperialism in the Twenty-First Century* is a seminal examination of the relationship between the core capitalist countries and the rest of the world in the age of neoliberal globalization. Deploying a sophisticated Marxist methodology, Smith begins by tracing the production of certain iconic commodities—the T-shirt, the cup of coffee, and the iPhone—and demonstrates how these generate enormous outflows of money from the countries of the Global South to transnational corporations headquartered in the core capitalist nations of the Global North. From there, Smith draws on his empirical findings to powerfully theorize the current shape of imperialism. He argues that the core capitalist countries need no longer rely on military force and colonialism (although these still occur) but increasingly are able to extract profits from workers in the Global

South through market mechanisms and, by aggressively favoring places with lower wages, the phenomenon of labor arbitrage. Meticulously researched and forcefully argued, *Imperialism in the Twenty-First Century* is a major contribution to the theorization and critique of global capitalism.

The Cambridge Handbook of Language Policy Penguin Maria Todorova puts in conversation several fields that have been traditionally treated as discrete: Balkans, Eastern Europe, Ottoman, Habsburg and Russian empires. People around the world are confused and concerned. Is it a sign of strength or of weakness that the US has suddenly shifted from

a politics of consensus to one of coercion on the world stage? What was really at stake in the war on Iraq? Was it all about oil and, if not, what else was involved? What role has a sagging economy played in pushing the US into foreign adventurism and what difference does it make that neo-conservatives rather than neo-liberals are now in power? What exactly is the relationship between US militarism abroad and domestic politics? These are the questions taken up in this compelling and original book. Closely argued but clearly written, 'The New Imperialism' builds a conceptual framework to expose the underlying forces at work behind these momentous shifts in US policies and politics. The compulsions behind the projection of US power on the world as a 'new imperialism' are here, for the first time, laid bare for all to see. This new paperback edition contains an Afterword written to coincide with the result of the 2004 American presidential election.

Vladimir Ilich Lenin's *Imperialism: The Highest Stage of Capitalism*, originally published in 1916, was one of the first attempts to account for the increasing importance of the world market in the twentieth century. The essay is a synthesis of Lenin's modifications and developments of economic theories that Karl Marx formulated in 'Das Kapital'. This remarkable Marxist text explains fully the inescapable flaws and destructive power of Capitalism. Lenin offers a predictive scenario of a world shaken by competitive instability, warfare and crisis, dominated by monopolies, the merging of finance and industrial capital, and fierce territorial competition. Its pertinence is now greater than ever. Lenin vaticinated that those third world countries used merely as capitalist labour would have no choice but to join the Communist revolution in Russia. His theoretical framework remains the best method for understanding recent global developments.

Kris Manjapra weaves together the study of colonialism over the past 500 years, across the globe's continents and seas. This captivating work vividly evokes living human histories, introducing the reader to interlocking pasts and ongoing legacies

of colonialism through the study of: war, conquest, militarization, extractive economies, migration and diaspora, racialization, biopolitical management, and unruly and creative responses and resistances. He describes some of the most salient political, social, and cultural constellations of our present across the Americas, Africa, Asia, and Europe. By exploring the dissimilar, yet entwined, histories of settler colonialism, racial slavery, and empire across Asia, Manjapra exposes the enduring role of colonial force and freedom struggle in the making of our modern world.
