Atlas of Clinical Ophthalmology Springer Science & Business Media

Synopsis of Clinical Ophthalmology, by Jack J. Kanski and Brad Bowling, efficiently distills all the essential information you need to effectively diagnose and manage a comprehensive range of ophthalmic disorders. A concise format makes it easy to quickly learn and understand the "must-know" aspects of each condition. When time is of the essence, turn to Synopsis of Clinical Ophthalmology for accessible guidance to meet your diagnostic and point-of-care needs! Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Get guidance you can trust from a portable, practical handbook that distills all the key information from Clinical Ophthalmology: A Systematic Approach - Drs. Kanski and Bowling's best-selling comprehensive eye reference. Visualize the most common eye disorders more clearly with the help of a completely revised image library, including clinical photographs and over 800 full-color illustrations, many of which are new. Remain current in practice with the latest advances in the treatment of retinal vascular disease (including new therapies for macular disorders); new drug therapies; updated surgery techniques for oculoplastic, corneal, and glaucoma surgery; and examination tips, imaging, and associated systemic conditions.

Basic Ophthalmology Anshan Pub

Fully revised and updated based on valuable reader feedback, Aldeen and Rosenbaum's 1200 Questions to Help You Pass the Emergency Medicine Boards, Third Edition gives you the tools you need to pass the ABEM board exam on the first try. Questions are slightly more difficult than the average exam question, in order to challenge and add to your knowledge and fully prepare you for questions you're likely to see. Every question in this Third Edition has been reviewed for quality and relevance, ensuring that this unique study tool is an ideal choice to prepare for both the in-service residency exam and the board exam in emergency medicine.

Review of Ophthalmology Mosby Incorporated

This practical manual provides a real-world educationally focused resource. It enables the reader to gain a good understanding of a range of skin diseases, their differential diagnosis and various medical and/or surgical treatment options. Topics covered include general dermatology, oncology, drugs, phototherapy, pigmentary disorders, skin of color, inpatient dermatology and pediatric dermatology. Emphasis is placed on concise, practical points that one can use in clinic, with informative pearls to reinforce the key messages in each chapter. Practical Guide to Dermatology: The Henry Ford Manual systematically describes a broad range of practical concepts, diagnostic and treatment techniques involving various dermatological disciplines. It represents a valuable reference guide for practising and trainee dermatologists alike.

The Health Effects of Cannabis and Cannabinoids Springer

Postgraduate Ophthalmology, Two Volume Set Clinical OphthalmologyBasic Ophthalmology

Winner of the Young Authors Award at the BMA book awards 2019! AND Highly Commended in the Medicine category! Here's what the BMA reviewers said: "I would unreservedly recommend this book to any medical student and indeed anyone else who wanted to learn more about internal medicine including junior doctors, nurses, physicians' assistants. I would have loved a book like this when I was a medical student." Medicine in a Minute is a new full-colour text covering the fundamentals of undergraduate medicine in one book. Medical students no longer have the time or inclination to read the huge texts that used to dominate this market - they need a concise book that covers the core information they have to know, and in a user-friendly format: Medicine in a Minute is this book! The book is edited and written by two of the authors behind the bestselling Cardiology in a Heartbeat and features several common design elements and features. It has quickly found favour with medical students and is consistently one of the bestselling medical student texts. The book is divided into body systems and then each section within

the particular body system follows a consistent pattern: Definition Epidemiology Risk factors Differential diagnosis Aetiology Pathophysiology Clinical features Investigations Management Medicine in a Minute is a student-friendly, concise text that you will want close to hand throughout your studies. Amazon 5-star reviews: "I love the final chapter with all emergency scenarios with ABCDE approach!" "Highly recommend this book to students especially clinical years and finals!" "I really like the layout and simple nature of this textbook. It covers all of the major topics in medicine and doesn't give you any waffle." "I've bought many medical textbooks during my time in medical school but I can simply say this is the best of its type. Pitched at exactly the right level for clinical medicine."

Clinical Methods in ENT McGraw Hill Professional

This well-illustrated two volume set covers the field of ophthalmology, from the fundamentals to the most recent advances. Each section is dedicated to a specific area of the eye and covers basic techniques, investigative modules and treatment methods. With the help of 2500 images and illustrations, this book covers topics such as glaucoma, ocular oncology, nystagmus, refractive surgery, strabismus and lasers in ophthalmology. Low vision, medico-legal aspects, operating room sterilisation and ocular emergencies are also discussed.

Aldeen and Rosenbaum's 1200 Questions to Help You Pass the Emergency Medicine Boards Jones & Bartlett Publishers

Fully revised, new edition presenting students with latest information in field of ophthalmology. Covers all sections of the eye and associated disorders and diseases. Previous edition published in 2008.

Oncology Springer Science & Business Media

Featuring brilliant art, engaging new case studies, and dynamic new teaching and learning resources, this 9th edition of Porth's Pathophysiology: Concepts of Altered Health States is captivating, accessible, and student-friendly while retaining the comprehensive, nursing-focused coverage that has made it a market leader. The book's unique emphasis on "concepts" of altered health states, as opposed to factual descriptions of diseases and disorders, helps students grasp both the physical and psychological aspects of altered health. Drawing on the expertise of new co-author Sheila Grossman, the Ninth Edition

maintains its comprehensive depth, while paring down content where appropriate and replacing descriptive content with striking art. (Approximately 600 illustrations are new or have been re-rendered in a consistent modern style.) Also new to this edition are advanced 3D narrated animations that address the most clinically relevant and difficult to understand disorders, engaging unit-opening case studies that reinforce critical thinking and set the tone for the content to come, and a wide range of built-in study tools. Now, for the first time, Porth's Pathophysiology is supported by PrepU, an adaptive learning system that help students learn more, while giving instructors the data they need to monitor each student's progress, strengths, and weaknesses. *SOCH - Simplified Ophthalmology Conceptual Handbook* JP Medical Ltd

The pediatric head and neck cancer patient necessitates a multidisciplinary team of specialists to provide an optimal continuum of care. This A-Z guide provides practical, in-depth information for all medical professionals involved in the evaluation and treatment of these patients. Written in an easy to follow format, each entry contains illustrative figures to aid in pathological and radiographical diagnosis, as well as structured discussion of evaluation and multimodality management. The alphabetical layout eliminates redundancy and allows the busy physician to quickly locate relevant information. Pediatric Head and Neck Tumors is ideal for young physicians as well as attending physicians seeking to expand their knowledgebase to the various subspecialties involved in the multidisciplinary care of their patients.

Clinical Ophthalmology Made Easy CBS Publishers & Distributors Private Limited

This fully revised and updated edition begins with insights into the scope, importance and continuing growth opportunities in the nutraceutical and functional food industries and explores the latest regulatory changes and their impacts. The book demonstrates the global scenario of the acceptance and demand for these products and explores the regulatory hurdles and claim substantiation of these foods and dietary supplements, as well as addressing the intricate aspects of manufacturing procedures. As the public gains confidence in the quality of these products based on sophisticated quality control, a broad spectrum of safety studies and GRAS, peer-reviewed publications and cutting-edge human clinical studies have emerged. An increasing number of additional populations around-the-world now recognize the efficacy and functions of nutraceuticals and functional foods as established by those scientific research studies. As a result, a number of structurally and functionally active novel nutraceuticals and several new functional beverages have been introduced into the marketplace around the world. Features fully revised and updated information with current regulations from around the world, including GRAS status and DSHEA regulators Offers 45% new content including three new chapters -NSF: Ensuring the Public Health and Safety Aspects of Nutraceuticals and Functional Foods; Role of the United States Pharmacopoeia in the Establishment of Nutraceuticals and Functional Food Safety; An Overview on the New Dietary Ingredient (NDI) and Generally Recognized as Safe (GRAS) Status, and the addition of cGMP regulations for dietary supplements Includes insight into working with regulatory agencies, processes and procedures Provides a link to the contact information for most regulatory bodies for readers wishing to gain further knowledge

Kanski's Clinical Ophthalmology E-Book Lippincott Williams & Wilkins

With the 13th edition, Wintrobe's Clinical Hematology once again bridges the gap between the clinical practice of hematology and the basic foundations of science. Broken down into eight parts, this book provides readers with a comprehensive overview of: Laboratory Hematology, The Normal Hematologic System, Transfusion Medicine, Disorders of Red Cells, Hemostasis and Coagulation; Benign Disorders of Leukocytes, The Spleen and/or Immunoglobulins; Hematologic Malignancies, and Transplantation. Within these sections, there is a heavy focus on the morphological exam of the peripheral blood smear, bone marrow, lymph nodes, and other tissues. With the knowledge about gene therapy and immunotherapy expanding, new, up-to-date information about the process and application of these therapies is included. Likewise, the editors have completely revised material on stem cell transplantation in regards to both malignant and benign disorders, graft versus host disease, and the importance of long-term follow-up of transplantation survivors.

Wife Goes On

At the last Annual Representative Meeting of the British Medical Association a motion was passed that "certain additional cannabinoids should be legalized for wider medicinal use." This report supports this landmark statement by reviewing the scientific evidence for the therapeutic use of cannabinoids and sets the agenda for change. It will be welcomed by those who believe that cannabinoids can be used in medical treatment. The report discusses in a clear and readable form the use and adverse effects of the drug for nausea, multiple sclerosis, pain, epilepsy, glaucoma, and asthma.

With the current rapid development of ophthalmic sciences, it is difficult for ophthalmologists to remain fully up to date with all areas of clinical specialty. The second edition of this atlas describes the latest advances in clinical ophthalmology. Each chapter deals with a separate part of the eye, discussing different diseases and disorders that may be encountered by ophthalmologists. Each condition is accompanied by concise descriptions of major and minor signs, as well as detailed photographs illustrating the disease. This comprehensive new edition features 3750 full colour images and illustrations, including more than 600 additional photographs. Images from the first edition have been replaced with better quality photographs taken with the Haag-Streit BX-900 Photo-Slit Lamp and the Zeiss FF 450 Plus Fundus camera. Key points Comprehensive, new edition bringing ophthalmologists up to date with the latest developments in clinical ophthalmology Each chapter deals with separate part of the eye Features 3750 full colour images and illustrations Includes more than 600 additional photographs Original images replaced with high quality new versions Previous edition published in 2006
