Get hands-on practice in medical insurance billing and coding! Corresponding to the chapters in Fordney's *Medical Insurance and Billing*, 16th Edition, this workbook provides realistic exercises that help you apply concepts and develop the critical thinking skills needed by insurance billing specialists. Review questions reinforce your understanding of your role and responsibilities, and assignments ask you to complete claim forms by extracting information from patient records and properly selecting procedural and diagnostic codes. Not only will you master the CMS-1500 and 837P claim forms, but you will understand each stage of an insurance claim. Self-study exercises reinforce your understanding with matching, true/false, multiple-choice, mix and match, and fill-in-the-blank questions, as well as critical thinking assignments. Key terms and abbreviations at the beginning of each chapter provide a quick reference to the health insurance terminology you need to know. Study outlines focus your review by listing the key points for each chapter. Performance objectives make learning easier by highlighting what you need to accomplish in each chapter. Critical Thinking assignments are based on short, real-world vignettes, preparing you to work in a real medical office and allowing you to apply theory learned from the textbook. Updated mock fee schedules present the latest information available, for use in completing forms and activities. Expanded coverage of inpatient insurance billing includes ICD-10 coding and CMS coding, ensuring that you are prepared to work in healthcare facility settings as well as the physician's office and outpatient settings. Updated information on general compliance issues, HIPAA, the Affordable Care Act, and coding reflects changes to the Fordney's *Medical Insurance and Billing*, 16th Edition text. Ambulatory Surgery Center chapter provides the foundation and skills needed for billing in this outpatient setting. NEW! Additional procedures provide more practice, helping you remember the material.

The Chemical Age Saunders

The Smoot-Hawley tariff of 1930, which raised U.S. duties on hundreds of imported goods to record levels, is America's most infamous trade law. It is often associated with--and sometimes blamed for--the onset of the Great Depression, the collapse of world trade, and the global spread of protectionism in the 1930s. Even today, the ghosts of congressmen Reed Smoot and Willis Hawley haunt anyone arguing for higher trade barriers; almost single-handedly, they made protectionism an insult rather than a compliment. In *Peddling Protectionism*, Douglas Irwin provides the first comprehensive history of the causes and effects of this notorious measure, explaining why it largely deserves its reputation for combining bad politics and bad economics and harming the U.S. and world economies during the Depression. In four brief, clear chapters, Irwin presents an authoritative account of the politics behind Smoot-Hawley, its economic consequences, the foreign reaction it provoked, and its aftermath and legacy. Starting as a Republican ploy to win the farm vote in the 1928 election by increasing duties on agricultural imports, the tariff quickly grew into a logrolling, pork barrel free-for-all in which duties were increased all around, regardless of the interests of consumers and exporters. After Herbert Hoover signed the bill, U.S. imports fell sharply and other countries retaliated by increasing tariffs on American goods, leading U.S. exports to shrivel as well. While Smoot-Hawley was hardly responsible for the Great Depression, Irwin argues, it contributed to a decline in world trade and provoked discrimination against U.S. exports that lasted decades. Featuring a new preface by the author, *Peddling Protectionism* tells a fascinating story filled with valuable lessons for trade policy today.

A groundbreaking account of America's role in global capitalism. The all-encompassing embrace of world capitalism at the beginning of the twenty-first century was generally attributed to the superiority of competitive markets. Globalization had appeared to be the natural outcome of this unstoppable process. But today, with global markets roiling and increasingly reliant on state intervention to stay afloat, it has become clear that markets and states aren't straightforwardly opposing forces. In this groundbreaking work, Leo Panitch and Sam Gindin demonstrate the intimate relationship between modern capitalism and the American state, including its role as an "informal empire" promoting free trade and capital movements. Through a powerful historical survey, they show how the US has superintended the restructuring of other states in favor of competitive markets and coordinated the management of increasingly frequent financial crises. The Making of Global Capitalism, through its highly original analysis of the first great economic crisis of the twenty-first century, identifies the centrality of the social conflicts that occur within states rather than between them. These emerging fault lines hold out the possibility of new political movements transforming nation states and transcending global markets.
