A deeply-reported examination of why "doing what you love" is a recipe for exploitation, creating a new tyranny of work in which we cheerily acquiesce to doing jobs that take over our lives. You're told that if you "do what you love, you'll never work a day in your life." Whether it's working for "exposure" and "experience," or enduring poor treatment in the name of "being part of the family," all employees are pushed to make sacrifices for the privilege of being able to do what we love. In *Work Won't Love You Back*, Sarah Jaffe, a preeminent voice on labor, inequality, and social movements, examines this "labor of love" myth—the idea that certain work is not really work, and therefore should be done out of passion instead of pay. Told through the lives and experiences of workers in various industries—from the unpaid intern, to the overworked teacher, to the nonprofit worker and even the professional athlete—Jaffe reveals how all of us have been tricked into buying into a new tyranny of work. As Jaffe argues, understanding the trap of the labor of love will empower us to work less and demand what our work is worth. And once freed from those binds, we can finally figure out what actually gives us joy, pleasure, and satisfaction.

These days, it seems that everyone has a strong opinion about how to teach young children to read. Some may brush off the current tension as nothing more than one more round of "the reading wars." Others may avoid the clash altogether due to the uncivilized discourse that sometimes results. Certainly, sorting the signal from the noise is no easy task. In this leading-edge book, authors Jan Burkins and Kari Yates address this tension as a critical opportunity to look closely at the research, reevaluate current practices, and embrace new possibilities for an even stronger enactment of balanced literacy. From phonological processing to brain research to orthographic mapping to self-teaching hypothesis, *Shifting the Balance* cuts through the rhetoric (and the sciencey science) to offer readers a practical guide to decision-making about beginning reading instruction. The authors honor the balanced literacy perspective while highlighting common practices to reconsider and revise--all through a lens of what's best for the students sitting in front of us. Across six shifts, each chapter identifies a common instructional practice to reconsider explores various misunderstandings that establish and keep that practice in play shares scientific research to support its reconsideration proposes an instructional shift to apply a new perspective, and details several high-leverage instructional routines to support implementation of that shift. By pinpointing gaps and overlaps--as well as common misunderstandings and missed opportunities between the competing lines of thought--Jan and Kari offer busy educators direction and clarification for integrating science and balance into their daily instruction, while keeping meaningful experiences with text a priority.

Club's fifteen best books of 2020 | A Sunday Times best book of the year Selected by students across France to win the Prix Goncourt des Lycéens, David Diop's English-language, historical fiction debut *At Night All Blood is Black* is a "powerful, hypnotic, and dark novel" (Livres Hebdo) of terror and

transformation in the trenches of the First World War. Alfa Ndiaye is a Senegalese man who, never before having left his village, finds himself fighting as a so-called "Chocolat" soldier with the French army during World War I. When his friend Mademba Diop, in the same regiment, is seriously injured in battle, Diop begs Alfa to kill him and spare him the pain of a long and agonizing death in No Man's Land. Unable to commit this mercy killing, madness creeps into Alfa's mind as he comes to see this refusal as a cruel moment of cowardice. Anxious to avenge the death of his friend and find forgiveness for himself, he begins a macabre ritual: every night he sneaks across enemy lines to find and murder a blue-eyed German soldier, and every night he returns to base, unharmed, with the German's severed hand. At first his comrades look at Alfa's deeds with admiration, but soon rumors begin to circulate that this super soldier isn't a hero, but a sorcerer, a soul-eater. Plans are hatched to get Alfa away from the front, and to separate him from his growing collection of hands, but how does one reason with a demon, and how far will Alfa go to make amends to his dead friend? Peppered with bullets and black magic, this remarkable novel fills in a forgotten chapter in the history of World War I. Blending oral storytelling traditions with the gritty, day-to-day, journalistic horror of life in the trenches, David Diop's *At Night All Blood is Black* is a dazzling tale of a man's descent into madness.
