Introducing Applied Linguistics provides in-depth coverage of key areas in the subject, as well as introducing the essential study skills needed for academic success in the field. Introducing Applied Linguistics: • is organised into two Sections: the first introducing Key Concepts in Applied Linguistics; and the

second devoted to the Study Skills students need to succeed. • features specially commissioned chapters from key authorities who address core areas of Applied Linguistics, including both traditional and more cutting edge topics, such as: grammar, vocabulary, language in the media, forensic linguistics, and much more. • contains a study skills section offering guidance on a range of skills, such as: how to structure and organise an essay, the conventions of referencing, how to design research projects, plus many more. • is supported by a lively Companion Website, which includes interactive exercises, information about the contributors and why they've written the book, and annotated weblinks

to help facilitate further independent learning. Ideal for advanced undergraduate and postgraduate students of Applied Linguistics and TEFL/TESOL, Introducing Applied Linguistics not only presents selected key concepts in depth, but also initiates the student into the discourse of Applied Linguistics. Susan Hunston is Professor of English Language and Head of the School of English, Drama, and American & Canadian Studies, at the University of Birmingham, UK. David Oakey is an Assistant Professor in the Applied Linguistics Program at Iowa State University, USA. Contributing authors: Svenja Adolphs, Aileen Bloomer, Zoltán Dörnyei, Adrian Holliday, Alison Johnson, Chris Kennedy, Almut Koester, Ruby

Macksoud, Kirsten Malmkjaer, Kieran O'Halloran, David Oakey. Juup Stelma, Joan Swann, Geoff Thompson, Dave Willis, Jane Willis and David Woolls.

The tender plant of Albanian literature

grew in a rocky soil. It was late to evolve and its development, indeed its very existence, was threatened in many periods. "Albanian Literature: A Short History" tells the story of the survival and growth of Albanian creative writing beginning with the earliest thirteenth century texts of Theodor of Shkodra, tracing the development of the modern literature of Buzuku, Budi and Bogdani, the incorporation of the Muslim influences of Frakulla and Kycyku and continuing with the works of Cajupi and Kadare during the reign of King Zog and the Hoxha administration. A unique book that illuminates an under-researched subject, "Albanian Literature" is an essential reference guide for all those interested in Balkan cultures, in comparative literature and in European cultural history in general.

What exactly are words? Are they the things that get listed in dictionaries, or are they the basic units of sentence structure? Andrew Carstairs-McCarthy explores the implications of these different approaches to words in English. He explains the various ways in which words are related to one another, and shows how the history of the English language has affected word structure. Topics include: words, sentences and dictionaries; a word and its parts (roots and affixes); a word and its forms (inflection); a word and its relatives (derivation); compound words; word structure; productivity; and the historical sources of English word formation.

Requiring no prior linguistic training, this textbook is suitable for undergraduate students of English - literature or language - and provides a sound basis for further linguistic study.

Presents the texts of thirteen tragedies by sixteenth-century playwright William Shakespeare, including "Romeo and Juliet," "Macbeth," "Hamlet," and "Othello." *Ottoman Population, 1830-1914* Otto Harrassowitz Verlag

One of the major contributions to theoretical linguistics during the twentieth century has been an advancement of our understanding that the information-bearing units which make up human language are organized on a hierarchy of levels. It has been an overarching goal of research since the 1930s to determine the precise nature of those levels and what principles guide interactions among them. Linguists have typically posited phonological, morphological, and syntactic levels, each with its own distinct vocabulary and organizing principles, but in *Deconstructing Morphology* Rochelle Lieber persuasively challenges the existence of a morphological level of

language. Her argument, that rules and vocabulary claimed to belong to the morphological level in fact belong to the levels of syntax and phonology, follows the work of Sproat, Toman, and others. Her study, however, is the first to draw jointly on Chomsky's Government-Binding Theory of syntax and on recent research in phonology. Ranging broadly over data from many languages—including Tagalog, English, French, and Dutch—*Deconstructing Morphology* addresses key questions in current morphological and phonological research and provides an innovative view of the overall architecture of grammar.

The present volume endeavours to throw light on a corner of Europe which is often ignored by historians. The book is not a

history of early Albania, but rather a collection of important historical documents and texts from the 11th to the 17th centuries, which will add to an understanding of the early history and development of Albania and its people. The vast majority of these works has never been published in English before. The first section of the book focusses on the emergence of the Albanians as a people and provides the reader with the earliest documents which make reference to them. The second, and main section of the volume provides a broader view of history and geography and, in particular, of life in Albania from the 12th to the 17th centuries. It relies primarily on the reports of travellers and chroniclers, many of whom offer fascinating, firsthand information on what they saw and experienced during their travels in the country.

*Introduction to English Morphology* Otto Harrassowitz Verlag

This title questions the validity of traditional terminology theory. The author's findings are that the traditional approach impedes a pragmatic and realistic description of a large number of

categories of terms.

Amartya Sen "Equality," I spoke the word  
As if a wedding vow Ah, but I was so much older then, I am younger than that now.  
Thus sang Bob Dylan in 1964. Approbation of equality varies not only with our age (though it is not absolutely clear in which direction the values may shift over one's life time), but also with the spirit of the times. The 1960s were good years for singing in praise of equality. The spirit of the present times would probably be better reflected by melodies in admiration of the Federal Reserve System. And yet the technical literature on the evaluation and measurement of economic inequality has grown remarkably over the last three decades. Even as actual economic policies (especially in North America and Europe) have tended to move towards focusing on virtues other than the avoidance of economic inequality, the professional literature on assessing and gauging economic inequality has taken quite a jump forward. A great many different problems have been addressed and

effectively sorted out, and new problems continue to be posed and analyzed. The Contents: A Review Jacques Silber has done a great service to the subject by producing this collection of admirably helpful and illuminating papers on different aspects of the measurement of income inequality. The reach of this collection is quite remarkable. Along with a thorough overview from the editor himself, the major areas in this complex field have been carefully examined and accessibly discussed.

This book is the first comprehensive survey of mood in the languages of Europe. It gives readers access to a collection of data on mood. Each article presents the mood system of a specific European language in a way that readers not familiar with this language are able to understand and to interpret the data. The articles contain information on the morphology and semantics of the mood system, the possible combinations of tense and mood morphology, and the possible uses of the non-indicative mood(s). The papers address the explanation of mood from an empirical and descriptive perspective. This book is of interest to scholars of mood and modality, language contact, and areal linguistics and typology.

From Ismail Kadare, winner of the inaugural Man Booker International Prize – a novelist in the class of Coetzee, Pamuk, Márquez, and Rushdie – the stunning new translation of one of his major works. In

the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets, and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. The Siege tells the enthralling story of the weeks and months that follow – of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in the balance, from the Pasha himself to the artillerymen, astrologer, blind poet, and harem of women who accompany him. "Believe me," the general said. "I've taken part in many sieges but this," he waved towards the castle walls, "is where the most fearful carnage of our times will take place. And you surely know as well as I do that great massacres always give birth to great books. You really do have an opportunity to write a thundering chronicle redolent with pitch and blood, and it will be utterly different from the graceful

whines composed at the fireside by squealers who never went to war." Brilliantly vivid, as insightful as it is compelling, *The Siege* is an unforgettable account of the clash of two great civilisations, and a portrait of war that will resonate across the centuries. *Introducing Applied Linguistics* Edinburgh University Press

Over the course of the past forty years, Gärard Genette's work has profoundly influenced scholars of narratology, poetics, aesthetics, and literary and cultural criticism, and he continues to be one of France's most influential theorists. The eighteen pieces in *Essays in Aesthetics* are of international interest because they are concerned either with universal aesthetic problems (the receiver's relationship to an aesthetic object, abstract art, the role of repetition in aesthetics, genre theory, and the rapport between literature and music) or with specific moments in the work of a well-known writer or artist (such as Stendhal, Proust, Manet, Pissarro, and Canaletto). *Essays in Aesthetics* contains a wealth of material related to the appreciation of beauty by one of the subtlest and most original minds working in aesthetics today. Genette knows the fine arts as well as he knows literature and as a result has innovative things to say to readers in that field as well as to philosophers and literary scholars.  Excerpt from *Discovery of Language: Linguistic Science in the Nineteenth Century* For the most part this work is a translation of Professor Pedersen's *Sprogvidenskaben i det Nittende Aarhundrede: Metoder og Resultater*, Copenhagen, Gyldendalske Boghandel, 1924, which appeared as Volume XV of *Det Nittende Aarhundrede*, an imposing series edited by Aage Friis and designed to present the cultural history of the nineteenth century in all its aspects. The relatively unimportant deviations from the original have been made either by the author or with his advice and consent. Scholarly works which have appeared since 1924, and are of such a nature as to affect the conclusions expressed in the original text, have been mentioned by the author in the translation; other changes include occasional amplification of a statement or the use of different examples. Word-forms thoroughly familiar to the Scandinavian reader might not be illuminating to the reader of an English translation, and therefore more appropriate examples have been selected in place of those on page 272, the first

paragraph of page 273, and most of the first paragraph of page 274 of the Danish text. The way of the translator is hard, as any one knows who has gone that way; especially hard when a work of a scholarly nature is involved, where extreme fidelity in translation is imperative. That way would not have been trod in the present instance if the translator had not thought he saw in the original certain cardinal virtues which would make the book a desirable addition to the English literature of linguistics. The problems, as well as the accomplishments, of the study of linguistics during this most important of centuries are faithfully and clearly recorded. Before each step in advance is described, the need for this step is pointed out, so that we have not merely a dry recital of events, but a story which gives us a series of living pictures of these pioneering intellects actually at work wrestling with problems the solution of which constitutes one chapter of the most stirring history we know, the history of the achievements of the human spirit in winning new knowledge. In spite of the tremendous advance in knowledge of the past century and a quarter, the results

have not been incorporated in our general culture. The average cultivated person of today can be expected to know less than nothing of linguistics.
