Gregorian Chant for Church and School Addison Wesley by Sister Mary Antonine Goodchild, O.P. What a wonderful find this is: an ideal textbook on chant for junior high, high school, or really any age. It is mercifully free of verbiage or exaggerated detail. It is short and completely clear on all aspects of learning to chant (notes, rhythm, Latin, style), and it contains a vast amount of the basic repertoire, in neumes and with English translations. It even has study questions! Many of us have wished that such a book would be written. It took Fr. Samuel Weber to point out that such a book already exists, and now, praise be to God, it is in print again. As the title says, it is the perfect text for Church and school. It came out in 1944 but it isn't in the slightest bit dated. This is priced for mass distribution.

A host of both very old and entirely new liturgical practices have arisen in digital mediation, from the live-streaming of worship services and "pray-as-you-go" apps, to digital prayer chapels, virtual choirs and online pilgrimages. Cyberspace now even hosts communities of faith that exist entirely online. These digitally mediated liturgical practices raise challenging questions: Are worshippers in an online chapel really a community at prayer? Do avatars that receive digital bread and wine receive communion? @ Worship proposes a nuanced response to these sometimes contentious issues, rooted in familiarity with, and sustained attention to, actual online practices. Four major thematic lines of inquiry form the structure of the book. After an introductory

chapter the following chapters look at digital presence, virtual bodies, and online participation; ecclesial communities in cyberspace; digital materiality, visuality, and soundscapes; and finally the issues of sacramental mediation online. A concluding chapter brings together the insights from the previous chapters and maps a way forward for reflections on digitally mediated liturgical practices. @ Worship is the first monograph dedicated to exploring online liturgical practices that have emerged since the introduction of Web 2.0. Bringing together the scholarly tools and insights of liturgical studies, constructive theology and digital media theories, it is vital reading for scholars of Theology and Religion as well as Sociology and Digital Culture more generally.

“Fascinating...sheds light on the history of the twentieth century for everyone.”—New York Times Book Review Now, with an updated preface, the latest edition of the definitive biography of Pope John Paul II that explores how influential he was on the world stage and in some of the most historic events of the twentieth century that can still be felt today. *Witness to Hope* is the authoritative biography of one of the singular figures—some might argue the singular figure—of our time. With unprecedented cooperation from John Paul II and the people who knew and worked with him throughout his life, George Weigel offers a groundbreaking portrait of the Pope as a man, a thinker, and a leader whose religious convictions defined a new approach to world politics—and changed the course of history. As even his critics concede, John Paul II occupied a unique place on the world

stage and put down intellectual markers that no one could ignore or avoid as humanity entered a new millennium fraught with possibility and danger. The Pope was a man of prodigious energy who played a crucial, yet insufficiently explored, role in some of the most momentous events of our time, including the collapse of European communism, the quest for peace in the Middle East, and the democratic transformation of Latin America. With an updated preface, this edition of *Witness to Hope* explains how this “man from a far country” did all of that, and much more—and what both his accomplishments and the unfinished business of his pontificate mean for the future of the Church and the world.

In response to many requests for a book descriptive and explanatory of the Gregorian Mass chants, the monks of St. John's Abbey, Collegeville, Minn., undertook the translation from the German of Dom Johnner's work under the above title. In the foreword the author indicates the scope of his work. He writes: "The present work is intended chiefly to serve as an aid to the prayerful rendition of the variable chanted parts of the Mass. At the same time it aims to be a guide for the worthy and artistic rendition of those chants which have been handed down to us from an age of strong faith and noble taste." Chant is essentially a form of worship offered by the faithful and as such is an integral part of the liturgy. It is intimately connected with the very source of all Liturgy, the Eucharistic Sacrifice, and attempts to interpret and express in music the sentiments which the text expresses in words. Individual consideration is given to the texts of the Introit, Gradual, Alleluia-verse, Tract, Sequence, Offertory, and Communion. These texts are given in Latin and in English, and are arranged in parallel columns. They are studied in their historical and liturgical setting, and their sentiments of joy and sorrow, hope and fear, gratitude and penance, are pointed out and developed. In this sense also the intimate relationship existing between these various texts is indicated; all are integrated into a unified whole and referred to the life of Christ and His Church. Following this short meditation, the author analyses the musical score accompanying the text, and attempts to show how Gregorian Chant interprets these various sentiments

and gives adequate expression to them in short, how Gregorian Chant is the perfect yet simple medium of translating religious emotion into the language of music. An indispensable condition for the intelligent use of this book as a guide for interpretation is the simultaneous use of the Vatican Gradual, since musical notation has not been included in the present work. However, only a minimum and very elementary knowledge of Gregorian Chant is necessary for the fruitful use and understanding of the book. Further knowledge is given in a very significant Introduction, which describes the structure and expressiveness of the variable Mass Chants. The original German, as also the English manuscript, have been made the basis for a very successful summer school course in the study of Gregorian Chant. The book might adequately be described as "a study in the appreciation of Gregorian Chant."
